

Connecting to a FGCU Library Lab printer from your Apple Macintosh

1. On Mac OSX 10, open Control Panel, then the Printer Setup Utility (or Print Center) in the Finder, under the "Go" menu, in "Utilities". The following window will appear:

2. Click the "Add" button in the toolbar (or the + symbol) to add a printer.
3. Select IP Printer in the Print Browser Window.

4. Select the new printer in your application and send the print job. It will spool directly to the printer. Prints jobs spool quickly and do not appear on your Laptops print queue window.
5. Go to any of the Lab's Print Release Stations and log in with your MAC short username (no password necessary). This username is found under Control Panel/SystemAccounts/ in the "short name" window of YourAccountName.
