## ACKNOWLEDGMENTS

Acknowledgments can create problems if the participation of a few are accidentally not mentioned in the listing of the many who helped bring the report to completion. Consequently, only a very few are mentioned here while the help and assistance of scores of people who provided the information, undertook the reviews, and tolerated the repeated pleas of assistance remain appreciated but unmentioned.

Of those who helped the authors would like to give particular mention for service "above and beyond." The first of these is Hudson Slay, Environmental Protection Agency Region IV, who wrote significant sections of the federal agency portion. The next is Bob Croft, Vice Chairman of the Citizens' Advisory Committee, who read every word and reworked several tables at the beginning of the report. Accolades are also presented to the "boys in the back," Rick Carpenter and Tim Walker, for their graphics support. Finally, Melissa Upton finalized the work of two persons not all that familiar with the new "word processing" technology (particularly regarding tables).

**Wayne Daltry, Executive Director  
Southwest Florida Regional Planning Council**
